## PROJECTS

### TAQWA

Mar. 2023 to Mar. 2023

Taqwa (تقوى) is a front-end application that provides essential Islamic tools in one centralized dashboard. Designed to serve as a daily reminder for practicing Muslims, The app offers features such as accurate prayer times, qibla direction, names of Allah, and Prophet's Hadith. Taqwa dynamically renders this information based on the user's location, ensuring precision and reliability. To enhance user experience, Taqwa offers multiple background themes that are seamlessly incorporated into the UI design.

Stack: React, SASS, Chakra UI, Aladhan API

### TEEBO

Nov. 2022 to Dec. 2022

Teebo is a full-stack social media application which allows users to engage in active discussions about their favourite TV shows. With Teebo, users can connect with other fans about their favorite TV shows and discuss the latest episodes, plot twists, and theories. The app utilizes TVMAZE api to add any TV show that has ever aired, as well as GIPHY api to encourage a wider selection of media content for user input.

Stack: React, Express, SASS, PostgreSQL, Cypress, TVMAZE API, Giphy API

### FOOD ORDERING APP

Oct. 2022 to Oct. 2022

Food Ordering App is a full-stack application that allows customers to order food from the website. The application uses Twilio API to communicate between the customer and the restaurant to notify them when there is an order and when the order will be ready for customer pick-up.

Stack: NodeJS, Express, PostgreSQL, SASS, Twilio API
